

Water Supply Availability

Status:

In Progress

IWR Contact:

Theodore Hillyer (Theodore.M.Hillyer@usace.army.mil)

Purpose:

This 3-Phase initiative to collect data was sent to the MSCs in March 2005. The Corps is trying to determine the current use and value of that storage space, the actual investment cost of that storage space and when that space might be utilized by the sponsor. If the sponsor has no need for that space and they are willing to reassign that space to the Federal Government, then the Corps will try to sell the space to others. There are issues in development the current costs to be recovered as well as legal implications.
